

Job Position

# Mobile Application Developer

**Trinomial Technologies Ltd.**, Limassol, Cyprus (Hybrid)

**Employment Type:** Full-time

**Work From Home (WFH) Option:** Yes

**Application Process:** Send us your CV via email at: [info@trinomial.xyz](mailto:info@trinomial.xyz).

## Who we are:

Trinomial Technologies is a trusted Research & Development partner to many businesses, organizations, and research institutes. Our team of experts at Trinomial Technologies transforms ideas and business needs into intelligent, bespoke operational and intuitive digital solutions. With 10+ years of research and development expertise, our researchers and developers can provide a wide range of expert services and deliver results and state-of-the-art products by exploiting cutting-edge research and innovative technologies.

We are looking for a talented Mobile Application Developer who will be part of our R&D team at Trinomial Technologies. As a member of our team, you will be engaged in the company's R&D activities, working with other great software engineers and data scientists, as well as external partners for delivering various projects and products.

## What will keep you busy:

- Develop and support high-end mobile applications and features.
- Ensure the performance, quality, and responsiveness of applications.
- Identify, correct bottlenecks and fix bugs.
- Writing clean, high-quality, high-performance, and maintainable code.
- Participate in and carry out code reviews.
- Support the test and deployment of new products and features.
- Continuously learn and invest in your personal growth and development.
- Staying abreast of developments in cross-platform mobile application frameworks.

## Qualifications:

- BSc or equivalent in Computer Science, Engineering, or any other related field.
- 2+ year of experience in a related Software Development position.
- Proven experience in hybrid mobile application development frameworks (React Native).
- Proven experience in React workflows (such as Redux).
- Proven experience with modern JavaScript (ES6+).
- Proven experience in SQL (SQLite).
- Familiarity with RESTful APIs to integrate mobile applications to server-side systems.
- Experience with Scrum or Agile software development methodologies.
- Proficient in the English language with excellent written and verbal communication skills.

## Nice to have:

- Experience using code versioning tools (Git).
- Experience in native Android or/and iOS development is considered an advantage.
- Working experience of HTML5, CSS3 is considered an advantage.
- Knowledge of TypeScript is considered an advantage.
- Knowledge of modern authorization mechanisms and protocols, such as JSON Web Token, OpenID Connect.
- Familiarity with Firebase Cloud Messaging (FCM) or any other cloud messaging service.
- Excellent analytical, and problem-solving skills with both developers and product members.
- Strong product sense to contribute back to design UI & UX.
- Being a self-starter who loves learning something new every day.
- Being creative and someone who loves brainstorming. You never know, you may have the chance to work on your ideas.

## Why is working with us awesome?

- Work-life balance - flexible working hours.
- Work from Home/On-site/Hybrid.
- Friendly and open environment.
- Competitive compensation & benefits (including 13th salary).
- 25 days paid annual leave.
- Annual performance review & annual performance-based bonus.
- Collaboration and networking with our great business and research partners across the globe.
- Never-ending challenging projects that could improve your skills or help you gain experience in challenging topics and domains.

## Last but not least...the Location!

Work and live by the sea! We are based in Limassol, Cyprus, where the beach is never too far away. Limassol is a city with a unique identity and buzzing nightlife and is an all-year-round tourist destination with 320 sunny days. Our offices are located in the heart of the city; bars, shops, markets, and restaurants are all a stone's throw away.
